The plot I have so far is: x = np.linspace(0, 5, 100) y1 = abs(-x**3 - 1) y2 = np.polyfit(x, y1, 3) y1 = y2[0] + (y2[1]/100) * x y2 = np.poly1d(y1) plot(x, y1, label = "my data") plot(x, y2, label = "the model") Which gives me the result above. I can't see a way to get a smooth curve over the range of my data (I can't see my data as a well-behaved function). A: You can add a smoothing spline through the origin, such that it connects the two series of points. import numpy as np from scipy.interpolate import splrep import matplotlib.pyplot as plt x = np.linspace(0, 5, 100) y1 = abs(-x**3 - 1) y2 = np.polyfit(x, y1, 3) y1 = y2[0] + (y2[1]/100) * x y2 = np.poly1d(y1) # add a spline with only one knot s = splrep(x, y1, 1, k=1) # compute the data outside the range y3 = [s(x)[1] - 0.5*s(x)[:-1] for x in x] y4 = [s(x)[1] - 0.5*s(x)[2:] for x in x] # plot the data plt.plot(x, y1, label = "
