Prior to AutoCAD, users of CAD had to switch their computer to a special CAD-compatible mode in order to enter a drawing. In the mid-1980s, a new class of computers emerged that could run CAD in non-CAD mode. These computers included the Apple IIGS and the Amiga, and they later became known as "CAD/CAM machines." Since these computers could also be used for other applications, AutoCAD's two original co-developers, Ron Landa and John Warnock, decided to package the app as a standalone program, separate from the machines it ran on. This new version of AutoCAD was released on 1 January 1987, three years after the original release. The main benefit of the new version was the ability to enter and view CAD drawings on a conventional computer without any special computer configuration. AutoCAD for the Apple IIGS and the Amiga was the first CAD app to be marketed for the non-CAD-mode market. One of AutoCAD's major features is that it allows a user to "fit" to a drawing's scale and size. By default, the scale is 1:1; however, there is an option to scale up or down to fit more space or to fit a model's original scale. This feature gives users the freedom to fit a larger or smaller drawing into a computer screen, on a specific drawing surface, or to fit a specific drawing into a model's original scale. AutoCAD is a 2D drafting and design program and, with the introduction of AutoCAD's 2D to 3D visual tools in AutoCAD 2015, is now also a 3D CAD program. (In AutoCAD 2016, the term "2D" was dropped from the title, and the program's name became "AutoCAD," while it still maintained the full two-dimensional capability of the original program.) AutoCAD allows for increased productivity through the use of a single data source. If a single project can be defined in an AutoCAD drawing, it can be shared with other collaborators. If you have a specific drawing format in mind that would work with other vendors' AutoCAD software, you can export a format that will work with any version of AutoCAD. This feature, called "Global Data," was first introduced in AutoCAD 2007. The Global Data feature allows users to store all their data

The recycling plants will be open from 7 a.m. to 6 p.m. Monday through Friday for the next month, said Tony Savas, the city's environmental services manager. The plants are an important step in St. Paul's plan to eliminate nearly 10 percent of its solid waste by 2020, a goal that comes amid a growing threat of climate change. The city has been recycling waste at two plants since 2010 and one before that. But the two new facilities — one at the old St. Paul Union Depot site in the Como neighborhood and another on the west side of the city — are expected to improve the city's ability to separate recyclable materials. "If people recycle, we can reduce our waste stream, and that helps us conserve our natural resources and our energy," Savas said. The Como plant is the first of its kind in the Twin Cities, according to a news release from the city. The west-side plant, which cost $6 million to build and has a capacity of 20,000 tons per week, a1d647c40b

Vajpayee criticised the Srikant Verma committee's report on CBI sting operation. (Express Photo) Vajpayee criticised the Srikant Verma committee's report on CBI sting operation. (Express Photo) Former Prime Minister Atal Bihari Vajpayee on Thursday alleged that the Srikant Verma committee set up to look into the "Vyapam scam" had been formed with a preconceived notion that there was no corruption in the BJP. "The Srikant Verma Committee was set up to identify political leaders who have been tainted by the Vyapam scam, but it has made a second victim of all those leaders who do not have anything to do with Vyapam," Vajpayee said in his blog. "The committee has, in fact, made a second victim of the Prime Minister, the Home Minister, the Cabinet colleagues who have nothing to do with Vyapam," Vajpayee wrote in the blog titled 'How Vyapam got defeated'. "How can the former Prime Minister, who was a witness in the case and a victim of political and financial manipulations, come to the conclusion that there is no corruption in BJP?" he said. In a first, the Srikant Verma Committee report, which found fault with several officials, including bureaucrats in the Home Ministry, the Department of Personnel and Training (DoPT) and the Sports Authority of India (SAI), will be considered by the ministry of external affairs and the CBI and both houses of Parliament. The committee, which has been formed in the wake of an expose by the CBI on scam in the Vyapam recruitment, will submit its findings in a fortnight. The BJP president will forward the report to both the Prime Minister and the Union home minister for their observations, sources said. Vajpayee had helped launch the probe on the Vyapam scam in 2012 after media reports about irregularities in the recruitment of officials at the Sports Authority of India (SAI). The BJP leader had been a witness in the case during a probe ordered by former home minister P Chidambaram who was then in power. ? The Indian Express is now on Telegram.
