"All information can be edited" "EMCO Network Inventory Professional Reviewed by Maureene S. on August 21, 2018 Product rating: 4 of 5 With a price of $199.95, EMCO Network Inventory Professional is a software application which provides users with a simple means of gathering important details about all the computers in your LAN, and generating reports. Hassle-free setup and well-organized interface You are required to go through a quick installation process, which does not offer to download any products that are not actually necessary for the program to run fully. Once you are done with it, you come face to face with a well-structured and clean GUI, as it consists of a menu bar, a few buttons, a folder structure and a pane in which to display details. In addition to that, extensive Help contents are incorporated thus making sure that both power and novice users can find their way around it, without encountering issues. Scan the local area network First and foremost, you are required to scan your LAN, so as to detect all available computers and information pertaining to them. This is possible by providing the IP range that interests you or by inputting the domain. You can also manually add machines or import them from CSV files. Impressive information retrieval and generation of professional reports You can bring up hardware information, such as total memory, logical drives, connected printers, video card, motherboard and processors, as well as some details regarding the software and system. For example, you can view the OS version, build number, install date, serial number, version, system up time and username. In addition to that, you can view a list of all installed applications, updates necessary, shared items, monitors connected, CD drives, running processes, startup commands, networks cards, environmental variables, memory banks, scheduled tasks and user accounts. All these details can be edited, machines can be
