
Legacy Of Kain Soul Reaver 2 [GOG] Cheat Engine

Jump is a group of two codes that change the speed and height of the jump (if used wisely, you can make Raziel fly. Just hold the wings and use the values...). The first code is "Hover", which increases your speed without increasing your height. The second code is "Wing Attack", which increases your height without increasing your speed. If you use one of these codes, you can, for example, fly around. If you use "Hover" while flying, you can use "Wing Attack" when landing.
