SQL-Hero

* Create databases, users, tables, views, trigger and stored procedures. * View all SQL DDL statements. * Compare tables, views and tables in databases. * Connect to databases. * Read and modify data. * Modify views and tables. * Read and write data from databases. * Create data types. * Import and export data to your databases. * Compare data between databases. SQL-Hero

Features: * Create databases, users, tables, views, trigger and stored procedures. * View all SQL DDL statements. * Compare tables, views and tables in databases. * Connect to databases. * Read and modify data. * Modify views and tables. * Read and write data from databases. * Create data types. * Import and export data to your databases. * Compare data between databases.

8. SQL Server Schema Comparison Tool SQL Server Schema Comparison Tool is a solution for database administrators who need to compare the database schemas across multiple databases in a network environment. It provides fast and reliable database comparison and is an ideal solution for extracting the database schemas from SQL server 2008, SQL server 2000, SQL server 7.0, SQL server 2005, SQL server 2000, SQL server 2000, SQL server 7.0, SQL server 2000 and SQL server 7.0. The tool has the capabilities to export the database schemas to a file format which can be read by other tools. 9. DB Compare DB Compare can be a very effective tool for comparing the differences between databases. Unlike a visual database comparison tool, DB Compare does not rely on visual representations of the database schema. Instead, it provides a wizard based, interactive comparison of two SQL Server Databases. DB Compare is suitable for comparing SQL Server databases from different SQL Server installations on the same or different computer. You can compare database schema, data, and metadata. DB Compare Description: * Compares databases by comparing their structure and stored procedures. * Organize database elements into a tree view of database elements for easy management. * Shows and highlights differences between databases. * Detect changes and different elements automatically. * Support for: SQL Server 2008, SQL Server 2005, SQL Server 2000, SQL Server 7.0, SQL Server 2000 and SQL Server 7.0. DB Compare Features: * Compares databases by comparing their structure and stored procedures. * Organize database elements into
