Printing Allows you to print lists and documents easily with a click. Emailing Sends the content to PDF format or to an e-mail address in real time. Conversion Allows you to change your content into a PDF document. Calendars Allows you to print calendars. Barcodes Allows you to print barcodes. QR Codes Allows you to print QR codes. External Links Allows you to share the selected page to another site via an external link. How does the Smart Print Pro Work? When adding this SharePoint component, you just need to check a couple of options that will make it possible to enhance the capabilities of the application in which you are working. The first thing that you will have to do is to check the item that you want to edit. The Smart Print Pro will be found in the Web Part gallery. After having clicked on it, the web part will appear on the page and the first thing you will have to do is to select a list or a document library. Then, it will be possible to work with that document or list through the menus that appear. The specific feature of Smart Print Pro is that the user can add the headers, footers, page breaks, section headings or any other element that may be needed. This functionality will be present after you click on the Select icon and after you choose the desired element. Then, click on the Print icon and the Smart Print Pro component will carry out all the needed tasks. The website resource will be selected by default, but it is easy to make it change in order to select another one. You will also be able to add the page size, orientation, margins and the number of pages in order to define the most suitable conditions. When everything is ready, you will have to click on the Print icon to carry out the entire operation. Benefits Easy to use You can print documents with a single click. Easy to add pages and section headings When adding the Smart Print Pro component, you will be able to add headers, footers and page breaks. Create PDF documents You can send your documents to PDF format in just a few seconds. Fully customizable The user will be able to add new headings, footers, page breaks or section headings. How to

You can link the values from the SharePoint lists and libraries in real time when the user is adding items to these collections. The PDF converter makes it possible to specify the desired output dimensions, in other words, the page size, margins, orientation and presentation page number. When it comes to the addition of headers and footers, this web part makes it possible to add these elements to each page of the document in real time. The barcode converter will make it possible to add labels and prices to the items in the SharePoint collections. The QR code generator will make it possible to add and print them into a special kind of page. And the calendar converter will make it possible to insert the dates, the hours, minutes and seconds in an easy way. When it comes to the audio and video converter, this web part will make it possible to add titles and subtitles to the SharePoint collections or files. Pros: An appealing feature of this web part is that it makes it possible to convert lists and documents into PDF files, thus letting the user manage the files with all the desired options. The converter makes it possible to add the desired headers and footers to each page, meaning that it is easier to print the documents. Using this piece of kit is very straightforward, as all the settings are extremely easy to specify. Cons: The potential presence of this web part is the fact that it will increase the database size. Downloads: Smart Print Pro is available for download from the Marketplace, and the process is not complex at all. It will only take a few minutes to install, and after that, the main part of the process is done. The important thing to remember here is that the converter will only work with files and collections and it won't be able to print the document until you download it. This means that you will need to add the collections and files into the tool manually. First of all, you will have to open the tool and then, you will have to click the button "Add files or folders" in order to let it find the documents and lists. The converter will start from the first item and will be able to print it with a single click. The Smart Print Pro is very easy to use and it will make printing quite a breeze, making the files even easier to use. Conclusion: As it was mentioned 77a5ca646e

Smart Print Pro is an extension for SharePoint that will provide the ability to insert items into a document, convert them to PDF, email lists and calendars.
