Punmia pdf free downloadÂ .Q: How to update specific property of entity in one table I have a table called 'UserAccounts' that has a single column called 'Username'. I have another table called 'Members' that has a single column called 'MemberID'. I want to update the username column of the 'UserAccounts' table, so that users with same MemberID will have same username. This is what i am trying to do: This is the code for the insert command public virtual void Insert(Member user) { using (var uc = _context.Context) { if (user == null) 3e33713323
