Note: This software solution is no longer available for purchase but users can still download it from softpedia and use it with its specific limitations. Managing and organizing our digital photos can be a hassle sometimes, especially if a software that is designed solely for this purpose is not installed on our system. If you find that this is your situation, you can try one of the applications that is most widespread nowadays - Picasa. This tool can be very well used without an Internet connection, although you can fully enjoy all its features only when you are online. Basically, Picasa is especially tailored to help keep all photos organized, regardless if you would like to sort them by album, date or some other type of information. Ad-riddled setup and simple-to-handle GUI Installation is pretty easy, yet you should pay an extra bit of attention because the setup package comes with third-party software that can change the settings of your web browser. The interface is pleasant as well as easy to use, enabling you to browse through your photos in an instant. Picasa automatically scans your computer for pictures and organizes them in folders, showing you thumbnails for instant browsing. Edit multiple items, back up data and create a collage Aside from the fact that it is such a powerful photo manager, this software utility also provides some nice editing functions. It enables you to resize and crop pictures and also add various effects to improve image quality. Picasa can automatically synchronize your library with a Picasa online account, so you can share and show photos to your friends with just a few clicks. Also included in the feature pack are a backup function, a picture collage creator, a batch editing script, a folder manager and many other goodies that can make your life a lot easier. A last evaluation All things considered, Picasa holds its own very well and given its popularity this may be one of the top choices for

any user who needs effortless photo sharing

Description: Popular Browser is the most reliable browser that is only aware of one thing - to make your life simpler. With its main focus on simplicity and ease of use, it won't bother you with pointless programs and useless options. However, if you feel that you need a little more, then Popcorn-Up browser offers you that without compromising the simple nature of Popcorn-Up. It includes all of Popcorn-Up's advantages, but it also has a few new ones. The most important of these is that, unlike Popcorn-Up, the Popcorn-Up in the browser offers its users a free space of about 50MB for their files. It is not very much, but when you think about it, a lot of other browsers that come with a more complicated and complicated setup offer you much less, and you are forced to pay for it. You will also find a button on the toolbar that you can use to stop the browser from caching, or to reload images and files from cache. It will not only save you time, but it will also enable you to go through web pages faster. Another interesting feature of Popcorn-Up is its tab grouping feature. When you open the browser, you will notice that the tab of the first website you open is highlighted. When you open the others, they will be added to this one. This way, you can create a few groups and put them in separate tabs, for example, you may open the websites in your work, those in your personal life, or those that you use frequently, as these will not only increase your productivity, but they will also help you organize your browsing sessions better. You may also change the color of your browser's tabs, font, and other details.
