What's New In AutoCAD?

Styled Lines: Line styles are now considered at the scene level, instead of the linetype level. This means if a line is styled in a scene, any line that is typed in that scene will be styled, too. Notebook, Audio, and Video (located in File | New | Item): New user interface. Annotative Graphics: Create and edit annotations that are independent from text. New symbols and elements: Define and manage new 2D, 3D and shaded symbol families and elements. Create shapes using the usual closed or open polygon tools, but also define new shapes that can be combined to create compound or patterned 3D shapes. Design-to-Dimensions (located in Math | Dimensions): Treat dimensions as if they were properties of design geometry. Spline display: Display polyline and B-spline curves as smooth spline curves, with an optional "fading" area where the interpolated curve's control points are outside the boundary of the spline. Join offset: Improvements to the offset operation. Open and save: Improved 2D and 3D view-ports and document management. Export to SVG, DXF, DWG, and DXF: Improved behavior when trying to export a drawing to PDF. Indicator Formatting: New Indicator Details dialog for easier selection of indicators. Background Paper: Improved design surface functionality with the new Background Paper feature. Better properties, drawing tools, and drawing tools creation (located in the toolbar): For improved usability and updateability, AutoCAD editors are now linked to a better set of template properties. New Formats: Output formats have been added for the DXF, DWG and RIBBON formats. They can be selected by right clicking on an item in the Format drop-down menu. New Paper Sizes: The following paper sizes and tray sizes have been added to the paper and print tray menu. Paper Sizes: A4 (297 mm x 420 mm) B5 (210 mm x 330 mm) Letter A4 (210 mm x 297 mm) Letter B5 (148
