OEM Configurator Crack Mac is a lightweight application whose purpose is to help users change the OEM (original equipment manufacturer) information without having to manually tweak registry items. Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to edit the OEM data on the breeze, without having to go through installation steps. OEM Configurator sports a clean and straightforward layout that allows you to set up the dedicated parameters with minimum effort. The tool gives you the possibility to edit the information in terms of manufacturer, support hours, website, model, and phone number. Plus, you are allowed to edit data related to owner, organization, computer and processor name, computer description, and product ID. Other important features worth mentioning are represented by the possibility to change the OEM logo by uploading an image (BMP file format) from your computer, preview the changes applied to your computer, as well as restore system data to its default value. Since it doesn't require much computer knowledge to work with this tool, even rookies can learn to master the process with minimum effort. During our testing we have noticed that the tool carries out a task quickly and without errors throughout the entire process. It doesn't stress up the CPU and memory, so the overall performance of the computer is not affected. All in all, OEM Configurator provides a simple yet efficient software solution for helping you edit the OEM information. #### What's New In OEM Configurator?

Would you like to add a custom splash screen to your computer? Are you looking for a tool that will help you set up the settings in a matter of a few clicks? If you answered "yes" to the previous questions, then you should definitely give OEM Configurator a try. If you are not a huge fan of Windows Vista or the recently released Windows 7, then it's time to make your voice heard. Although Microsoft made some improvements to Windows Vista, but as a whole, it's not too much better than the Windows XP. Therefore, to make the experience of using Windows Vista more exciting, many Windows Vista users around the world have started looking for ways to make their favorite OS appear like Windows XP. One such method is the use of a custom splash screen or desktop wallpaper. A custom splash screen, which is a replacement for the Microsoft Windows Vista Splash Screen, gives the user the experience of running Windows XP with the launch of the operating system. There are a number of reasons why users would want to use a custom splash screen, and you can use the following two examples to help you decide if a custom splash screen is something you need or want. No matter what type of computer you have, you may want to have a customized desktop background. While the default desktop background may be all right for you, you can always go to the Internet and find a desktop background that will match your style. Every PC has a unique computer
