The application is available to download on the web from the developer's official page, free of charge, but has a slightly different price. It's $2.99 on the Mac App Store, but it costs $9.99 at Tenorshare. iCareFone Cleaner description: iCareFone Cleaner is a lightweight application designed to help you free up space on your iPhone as quickly as possible. This can be done by removing unused files, old photos, app data, and large files. Clean your iPhone by removing junk data There's nothing special to be mentioned about installation aside from the fact that it doesn't require iTunes, which cannot be said for most apps dedicated to iOS-related operations. Make sure to plug your iPhone into the PC via USB cable in order to connect it to the tool as well as to make the computer as trusted on the device. The connection cannot be made wirelessly. An overview of your iPhone is displayed afterward, so you can check out the device name, type, iOS version and serial number as well as the system and total storage. The scanning procedure can be

triggered with the click of a button. Remove junk, temporary and large files As soon as the scanner is over, you can find out the total amount of space that can be freed up by cleaning junk and temporary files, images, large files as well as apps. Each category is accompanied by a description. Also, photos can be previewed (thumbnails) so you can pick the ones you want to remove and keep the rest. We haven't come across any compatibility issues with the latest Windows and iOS version in our tests. The utility scanned the iPhone and removed junk data fast, without error. Fast and easy-to-use iPhone cleaner It doesn't grant more control to users interested in viewing the exact junk files to decide between removing and keeping them. On the bright, it's fast, straightforward and intuitive, ideal for casual users looking for an uncomplicated iPhone cleaning solution. Additional features can be found in Tenorshare iCareFone, such as backup and restore. iCareFone Cleaner for Windows is a basic application developed by a team of experienced programmers, having a good number of devices under test. The cleaning tool, which is a tool that may be run from a USB-connected device. This basic app allows you to free up storage on your iPhone by removing

unused files, photos, unused apps, documents and other digital content. iCare
