Tip In most cases, importing an image file into Photoshop is the best way to go. If you have a Photoshop-compatible file format (such as JPEG), you can open the file into Photoshop as a background for any editing work you do in Photoshop, so don't waste time burning a copy of the file to a CD (if you're on a Mac) or creating a disk image (if you're on a PC). By using the '.psd' file format, you can always access the image file the same way you would edit it. ## Importing an Image Photoshop's Import feature is designed to be very helpful in getting just the right image into Photoshop. The first time you work in Photoshop, you might be a little bewildered by all the options. So, to get a good start, start with this handy shortcut: * Choose File→Open. Alternatively, you can click the Import button (the round button with the camera icon) in the Photo Bin at the bottom of the workspace (Figure 2-1).

Q: Change name of form input I have a name="password" Is there any way to change that to something like name="password2"? So that the input gets pre-filled with whatever I've typed in? Currently, when I type 1 on the first field, it gets pre-filled with 1 on the second. A: You can just define a custom request attribute, which will be available as the same name in the form field class

```

Easter Sunday: Text Easter Sunday is the day when the Church remembers the most. This is because the Paschal Mystery, the death and resurrection of Christ, is what the Church celebrates. According to tradition, Jesus was buried on the day after his death and resurrected on the day after his resurrection, which is why they call the week between the two days of his death and resurrection Sunday. For the earliest Christians, the week between the crucifixion and resurrection was not just a week. It was the same week of the Lord's life on earth.
