Systerac Tools Premium is an application that can help you clean up and maintain your operating system, in order to improve its performance. The interface of the program is clean and intuitive. Users of any experience level can easily learn how to work with the software. So, you can select "Disk Cleaner" to remove unnecessary files and free up space, and "Memory Optimizer" to improve the overall speed and stability of your computer. Plus, you can use "Registry Cleaner" to delete invalid keys found in the registry, "Disk Defrag Quick" to perform a simple defragmenting task, as well as "Disk Defrag Advance", which is more thorough than the previously mentioned tool. In addition, you can access "StartUp Cleaner" to disable unwanted programs which automatically run at system startup, "Registry Backup" to make copies of your Windows registry keys (just in case anything goes wrong after using "Registry Cleaner"), along with "Registry Compactor" to prevent registry errors. Moreover, "Tweaker" lets you configure options when it comes to a shutdown and crash event, logon, taskbar, applications, Internet Explorer, security, restrictions and file system, while "1-Click WindowsCare" quickly performs a complete tuneup. Systerac Tools Premium also lets you schedule a power management function (e.g. log off, shut down, hibernate). But you can also view hardware information, fix hard disk issues via "Disk Doctor" and permanently delete files beyond recovery, thanks to "File Shredder". In the "WindowsCare" section, you can set Systerac WindowsCare and Background Defragmenter to automatically run at system startup, as well as perform an automatic cleanup, fix, memory booster and defrag task. The program uses a low-to-moderate amount of system resources. Unfortunately, we weren't able to access the help file (clicking the option didn't initialize anything). Also, an error popped up when we ran "Memory Optimizer" but it didn't seem to interfere with the overall process. All in all, Systerac Tools Premium is a very good software for managing and improving your computer and we strongly recommend it to all users. The a program that needs to be run once after Windows installation. Once this program has run, the following tools are automatically started up: Systerac Tools. You can disable the automatic start-up of the tools by using

KEYMACRO is an application designed to create macros and automate repetitive actions. Systercac Tools Premium is an application that can help you clean up and maintain your operating system, in order to improve its performance. The interface of the program is clean and intuitive. Users of any experience level can easily learn how to work with the software. So, you can select "Disk Cleaner" to remove unnecessary files and free up space, and "Memory Optimizer" to improve the overall speed and stability of your computer. Plus, you

What's New in the Systercac Tools Premium (formerly MindSoft Utilities)?

What can be more frustrating than shutting down your PC, and then immediately turning it back on again in the hope that it will be a little bit faster? For a small sum of money, you can stop this from happening every time you want to power down or power on your computer. Once installed, Systercac WindowsCare will run in the background and automatically scan your system, identifying areas where improvements can be made. Once it has completed its task, it will notify you that the cleaning process has been completed. Installing Systercac WindowsCare is a piece of cake. Simply download and install the installer, and once done, you can begin watching your computer run faster. When the computer is fully powered on, your computer will be prompted to run the WindowsCare system restore. After performing a system restore, Systercac WindowsCare will begin to work silently in the background. **SYSTERAC WINDOWS CARE AND BACKGROUND DEFRAGMENTER** When you select "Startup Cleaner" in the programs menu, your computer will automatically begin to remove unnecessary applications and Windows services from running at startup. Also, Systercac WindowsCare and Background Defragmenter will run as part of the cleaning process, silently keeping your computer running smoothly, even if you are not using it. When your computer is shut down, Systercac WindowsCare will begin to remove any files that are no longer needed. When you turn on your computer, it will automatically reinstall any of these files that you may have deleted. **SYSTERAC WINDOWS CARE AND MEMORY OPTIMIZER** When you click "Memory Optimizer", your computer will begin to analyze your system and identify areas that are using memory, as well as create a plan to free up some of the memory being used. When Systercac WindowsCare and Memory Optimizer are finished, you will be presented with a summary of your system. **SYSTERAC WINDOWS CARE AND REGISTRY CLEANER** When you click "Registry Cleaner", your computer will begin to remove any invalid keys that are found within the registry. When finished, you will be

presented with a summary of your registry, displaying any files that were removed. **SYSTERAC WINDOWS CARE AND REGISTRY BACKUP** When you select "Registry Backup", your computer will begin to create a backup of your system registry. This will allow you to create copies of the keys that are found within your registry, so that you are never without a backup. **SYSTERAC WINDOWS CARE AND REGISTRY COMPRESSOR** When you select "Registry Compactor", your computer will begin to compress the keys found within the registry. This will reduce the amount of disk space that is being used, as the registry keys will be shrunk in size. **SYSTERAC WINDOWS CARE AND 1-CLICK WINDOWS CARE** When you select "1-
