Getting Started Photoshop is a desktop image editing program that can be purchased as a standalone program or bundled with other Adobe products, such as the Adobe Creative Suite, so that it can be used by the entire family. You can download the latest version of Photoshop from the Adobe website. Photoshop CS3 is the most recent version available, which is the version you will most likely be using as a beginner. There are also older versions of the software, but they will have been superseded by other Adobe products. Photoshop CS3 works on any operating system, including Windows and Mac OS X. It will run on any supported version of the Microsoft Windows operating system from XP to Windows 10, though you will need to update to a newer version of the operating system if you wish to take advantage of the latest version of Photoshop. Note: When using Photoshop CS3 for Windows, most of the tutorials and images will be supported on all versions of Windows but you will need to use Photoshop on a version of Windows that is supported. As soon as you download the Adobe Photoshop CS3 program, you will see it create an icon in the taskbar of your computer. The icon will show the current version of Photoshop that you have downloaded and click on this icon to start your new installation of Photoshop. This will show the installation window. Installation of Photoshop Photoshop will now scan your hard drive and software for other applications. Next Photoshop will go through the installation steps. The first thing you will see is an installation program banner that will try and get you to purchase additional products from Adobe. You are not buying anything here, so just click Cancel to exit the installation. You will then see another screen where you will be asked to choose the installation location on your computer. This location is where Photoshop will be installed, so be sure to choose a location that is easy to find. There is also an option to add Photoshop as a plug-in, so be sure to choose that option, too. The next screen you will see is to choose a language for Photoshop. Unless you are used to using a different language, it's best to leave the default English as selected. The next screen will allow you to customize the Photoshop installation. You can leave all of these options as is or customize them to suit your needs and requirements. Photoshop will first scan your hard drive for other applications. It will have already installed all of the other tools

No. 8 University of Houston Photo by Rick Yeatts Houston 2012-13 Record: 20-14, 10-6 in the American Athletic Conference. Last Year: Lost in the first round of the NCAA Tournament to No. 7 Michigan. New Coaches: Assistants Kevin Byrnes, Jerrance Howard, Joe Tartamella. First-year head coach Mike Rhoades replaces Kelvin Sampson, who left for Oklahoma to become the Sooners' coach. Key Returnees: Just nine of the 18 players who were on last year's team are back. Center Cory Alexander returns after missing all of last season with a torn ACL and will play a crucial role on this team because of his size and ability to score the ball. Guard JaMychal Green was the AAC player of the year last season, and he will be Houston's leading scorer. Guard Omar Calhoun and forward-center Kavell Bigby-Williams are also back, along with forward Aaron Ross. Top Freshmen: (7) Guard Joshua Riddell, forward Jameel Berry, guard Will Baker, forward Lester Medford, forward Richard Solomon, forward Jarred Vanderbilt and forward Isaiah Wright are three of the top freshmen in the American Athletic Conference. Outlook: Houston returns a core of players led by Alexander, Green and Calhoun, but it will be hard-pressed to make a serious run at the American crown because it has lost only nine players and has a new head coach in Mike Rhoades. Houston was a No. 8 seed in the NCAA Tournament last year, where it lost to No. 7 Michigan. The Cougars have more talent than last year's team and will be a dangerous team in the AAC. Riddell and Berry should be a dynamic duo at guard.Emergency management of a complex plane fracture dislocation with associated rib fracture: case report and review of literature. What's New In?

I love to read and write and spend my free time thinking up stories and playing chess. For myself as well as my peers, writing is the best way to share our dreams, wishes, fears and worries with the world, and everything else that goes along with real-life. As a fellow writer, I appreciate when others are willing to share their dreams as well, to celebrate with me the wonderful experience of life, of becoming a writer (and something more besides). Trying to keep up with the blogosphere is a challenge, so I haven't been around that much in the last two months. But it's on my mind for a few reasons. The first is the fact that we are nearing the three-year anniversary of my blog, and in that time frame I've learned a lot about the online world and the people I've come to know through it. I've built new friendships, and I've talked with people I'd never met before. The second is that I have an upcoming book project that, as a working creative, is something I'd like to share in this space. And the third is that I've been having some questions about how I think about the blogging and publishing process, about how I want to present my work and myself to others. I've been thinking about this and refining my ideas for how to tackle the second question (the book project), while wondering about how to move forward in the first two. Should I just write about the book project itself, or should I also share my thoughts and feelings as I'm approaching it, working on it, and just generally processing it? I'm not too sure yet. And that's fine. I like to think that my blog has been a kind of therapy for me; it's through writing that I've learned how to express myself and better understand myself. I've made mistakes. I've failed, as all writers do, but it's all part of the journey. And writing about it has been cathartic for me in that it allows me to come to grips with my past and to finally release my feelings. But, at the same time, it's difficult for me to do that too much, for fear of repeating myself. I need to find a new way to express myself, this time, since my work is
