He was born of a noble and wealthy family in Vitoria which held the position of majordomo of the courts of the Governor General (Accademia de Gran Consejo) the city of Zaragoza, and of the King. His father, Luis de la Riva, was one of the founders of this institution in 1519 and 1531, and his grandfather was Martin de Sosa, the first of that name to hold the position of majordomo. De la Riva was a prolific author, and wrote histories of Leon, Navarre, and Aragon. He was considered one of the foremost historians of the time. He also wrote a history of the conquest of Granada and the Spanish discoveries. He became one of the first members of the Real Academia de la Historia. Some of his works were published by the Sociedad Bibliográfica de Crítica y Reforma. References Miguel V. J. 2 Minute Timer is a straightforward piece of kit that facilitates a simple means of counting down time from 2 minutes. It features a robotic male voice and speaks the commands as soon as you trigger them, as well as when time's up. Software requirements and easy setup Installing this application doesn't take long and requires minimal attention. However, you know download and install.NET Framework unless you already have it, since the tool was developed with the aid of this software framework. Modern Windows iterations have it built into the system. Clear-cut interface for counting down time from 2 minutes When it comes to the interface, 2 Minute Timer opts for a simple window that takes a straightforward approach. The text with 120 seconds is displayed in large, black numbers,

and it's accompanied by three buttons for starting, stopping and resetting the timer. As previously mentioned, the software utilty has an integrated robotic voice that can be heard every time you click any of the buttons. The stop button is actually for pausing the timer since it can be resumed by clicking on start again. Robotic male voice speaks the commands When time's up, the app plays three beeping sounds to draw your attention, which especially comes in handy when you're working with other programs. No message dialog pops up on the screen, and there are no other types of visual cues to let you know that time's up. Sadly, this is where the program's functionality ends. Poor set of features for a countdown timer As expected from such a compact software utility, it had minimum impact on the computer's performance, so it didn't hog RAM and CPU. On the other hand, it had a slow response time to commands, especially when attempting to click on buttons quickly. Nonetheless, you can test 2 Minute Timer for yourself to discover any compatibility issues with your operating system. 2 Minute Timer is a straightforward piece of kit that facilitates a simple means of counting down time from 2 minutes. These compositions reflect a balance between a rapid rate of supply and utilization. Chalcocite is a common mineral but it is highly volatile and is commonly found as a contaminant in any form of sulphidic copper ore. The starting point for the manufacture of copper is the sulphuretted copper ores, but this ores require a high degree of processing, both to beneficiate the ore and
