proclaimed Emperor of Blow Pops
visits. Translated from the original
Japanese below. From the seller's

profile: "This will be such a release that will have you transfixed and crying out for more.... I had trouble with the material, wanted to make it more uniform.... they were made very carefully.... Recently we've been attending a lot of events in Japan, and it is likely we will have another release.... To the fans of hard work and personalities who are already in this game, thank you. We will raise the bar higher." A self-proclaimed self-proclaimed emperor, Sato is one of Japan's most beloved novelty toy figures.

"Sato" means "buttocks" in Japanese, so he's also known as "Sato-kun." Based on the original series of characters by Konstantin Konik (a Russian artist who created the "Un-Nested Man") sold all over Japan with obscene jokes and epigrammatic commentary on life, Sato-kun is now an anim  series with its own spin-off merchandise, a film festival, and a new manga adaptation. Thanks to his notoriety in Japan, Sato-kun is not as uncommon as he once was, but he still remains one of the

rarest collectibles in this country.

Cimatron E12 SP1 x64 3.91 GB Description: Cimatronit is an integrated CAD / CAM system. The software is intended for use by. Self-complementary conformation of a disulfide-bonded peptide containing a cyclic peptide bond. A self-complementary peptide, cyclo(CH₂-CONH-Phe-Pro-Phe-Val-Pro-Leu-Leu) (CFP), was synthesized by the conventional methods and its conformation in aqueous solution was studied by CD, NMR spectroscopy, and molecular mechanics calculation. The CD spectrum shows that CFP has a predominant structure in aqueous solution consisting of the C- and the S-strands of beta-sheet conformation. In the 1D and 2D NMR spectra, the assignments of H₂, H₄, H₆, and H₆' in beta-strands were confirmed, and the H₆ proton was clearly identified. In contrast to the alpha-helix conformation, the beta-strand conformation in the disulfide-bonded peptide is destabilized by the disruption of intramolecular hydrogen bonding (Gly-NH-A) and interchain hydrogen bonding (NH-Phe-Phe). Furthermore, the stereochemical properties (C₄ = C₅) were confirmed in the NMR spectrum. The experimental and calculated ¹³C chemical shift values support the preferred conformation of CFP. Our results clearly indicate that the disulfide-bonded beta-sheet conformation is stabilized in the self-complementary peptide. Actually no, the digit 5 is a number, and when used with letters in a number it becomes a noun. If you wanted to be precise about it you could say 5 is a noun. I'm not being pedantic. No more than you should say I'm being pedantic.AUSTIN — A group of Texas business leaders on Friday will unveil a proposed amendment to the state's constitution that would abolish the death penalty and replace it with life imprisonment without parole. The proposal by a coalition of business, criminal justice, religious, social and political leaders — many of whom have criminal records — is a continuation of an effort that began more than a decade ago and was taken to the ballot last year in an unsuccessful effort to get voters to abolish the death penalty. Though the group's leader, David Crum, has a criminal history, including arrests for vandalism and public intoxication, the group has vowed to ensure it is transparent about the criminal records of those participating in the effort, particularly of its members who have served time in prison. The new effort, to be unveiled at a press conference Friday at the University of Texas at Austin, will be led by Crum and four other co-chairs, and endorsed by a group of lawmakers who have signed on as co-sponsors.
