Activation Code is a useful tool for the developers who need to create applications that use similar code. This program is able to create a list of the code fragments that you frequently use and export them with minimum effort. You can add a description for each code fragment and quickly export the source code to a text file or another format. The code editor supports code highlighting and can display line numbers in order to easily review the content. You can also download CodeMemos Portable Full Crack (installer version). Win32 . Show your app as featured, with description, screenshots and... . About Me My name is Martin Fraiser and I am a freelance game programmer and artist. I have written several childrens games: the scrabble tile game Scrabble with tiles (for Windows), and a cardgame called Split Poker (for Windows). I have created many games for the Snes. The oldest one that I wrote is a lightpuzzle game for the Super Gameboy: Helixx (for the Snes). I am currently working on a 2dMafia Game for the iPhone called Matiel karas (Slovak: Murderers and the cornered ones). Note I am not here to advertise anything. I am here to support the language that I am using to develop software for (as a programmer and designer) so I hope you will excuse me for that. I don't need ads, but if you find what I write interesting or useful, please don't hesitate to make a donation. It won't be so expensive as to get me to close my project, but what is important is that I don't have to sacrifice what I do to pay for the webhosting. What I've done is to offer what I do for free. My total expenses as webhosting, domain & other costs are around € 50 per month (EUR) from a european country. I accept PayPal and other e-currencies. You can make a donation as well. All the money that will be provided to me will be invested in the further development of my projects. If you find this page useful, please make a donation. Any donation will be highly appreciated.
