Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between. RPGiMO's Gwent RPGiMO's Gwent Review The world of "The Witcher 3" felt incredibly familiar to me. I myself live in a small village in South-Western Poland that is very similar to the one in the game. Every time I travel to another place, whether it is another village or a village-sized city, it's like stepping into the Witcher's world. It is probably one of the most fun aspects of "The Witcher 3" and the reason why I kept playing the game for over 200 hours. "The Witcher 3: Wild Hunt" is an open world role-playing game that allows you to travel freely between various locations, complete quests that take you through South-Western Poland, get to know a vibrant cast of characters, engage in PvP battles, and explore the vast world. The game features a complex storyline with incredible world lore, a few thrilling challenges, and an engaging combat system. Gameplay The world of "The Witcher 3" is divided into three sections: Novigrad, Skellige, and The Wild Hunt. Each section consists of a diverse range of locations and all of them feature their own unique features. The Northern part of the world, for example, is especially populated with small villages located between large forests and is best explored on horseback. However, the wilderness of the South is home to a large city where monsters are constantly on the prowl. In the game, you can travel freely between the various locations and it's up to you where you want to go next. The player can complete quests, travel to locations on the overworld map and engage in PvP battles with other players. Each part of the game features quests that focus on a certain character. Completing them will often bring you to locations that you can visit for free, but by doing so you won't learn about the plot. The game features two main mechanics: runes and hexes. The first is used to level up your character by casting magic. Hexes refer to various elements such as fire, ice, and so forth, that can either be used to attack your enemies or to protect yourself. The available spells and runes are located at the bottom of the screen and can be cast bff6bb2d33
