FIFA 20's game engine could not render gameplay without a lengthy and costly optimization process. A new game engine, a new game engine, new motions, new physics, new rendering, and new animations are just the start of the improvements for this year's iteration. Everything is new and improved. Read more: Here are all the changes coming to FIFA 20 Now we'll take a look at some of the new features and improvements coming to Fifa 22 Torrent Download, and what we're excited for next year with FIFA 24. **NEW CONTROLS AND UPDATES** For starters, the new control design in FIFA 22 allows for a more intuitive and deliberate game-play experience that enhances soccer-like immersion. There is no longer

---

a touch of a button for every game action, like a button for passing the ball, a button for shooting the ball, or a button for running to your midfielder. Instead, FIFA 22 uses precision input controls that truly respond to the player's actions. FIFA 22 players can use a combination of left joystick to make passes to a teammate or goalkeeper, stick on left or right to shift towards a specific direction, and through an L2 button to shoot the ball. All the buttons have been relocated to the sides of the controller, replacing the A, B, X and Y buttons on the PlayStation 4 and PC. The face buttons are now placed on the back of the controller, facing up and to the side, for easier access, but some players may prefer the previous layout. You may have also seen a new control scheme being adopted in FIFA these past few years. It's been getting a lot of praise for its ability to adapt to players with all types of play styles. However, it's unclear if the new

---

controls in FIFA 22 can appeal to a broader audience or if it's just catering to existing players who have played FIFA for years and familiar with their controls. And while it's the start of a new era for the game, it's also a huge departure from previous iterations, so maybe it's just the new age in soccer control that's getting us all excited. Some of the other improvements to controls in FIFA 22 include the following: Crouch for fast, precise passing Pass with quick, softer touches for defenders Air dribbling for wingers and attackers Run and pass to your target with a one touch. Press L2 to shoot.
