Vernal Edge was developed by Ingo Weis and Christophe Boinot for the 2D action-packed Metroidvania genre. It features beautiful 2D graphics with hand-drawn sprites and animated cut-scenes. The soundtrack includes 15 instrumental pieces by :Inigo Lissón (The Nightmare) and Terranaute 0.3 available at And the voice acting of the following professional actors: - Isarain Bioleto: Has hand-drawn animations. - Dominique Lafayoix: - Vicky Michiels: - Philippe-Hervé Desportes: - Beige: - Ludovic Fakir: - Vincent Homa: - Rony: - Clémentine Bussières: INRULU a very personal game developed by a big fan of classic adventure games, a fan of Metroidvanias, and a lover of art Vernal Edge is a 2D action-packed Metroidvania featuring an intense combat system, tight platforming sequences and a powerful story of rivalry, revenge and growth. The Kingdom of Haricot stands out as a complete mystery as 20 years before the event of the story, it inexplicably took to the skies, turning into a series of disconnected floating islands, allowing the power-hungry Church of Aloe to take hold of the land. Entering Haricot by sneaking on one of the Church's aircrafts, Vernal has a personal disdain for the Church and its agents. She is an independant adventurer, travelling through Haricot as she searches for revenge on her long-gone deadbeat dad. Blessed with an abnormal martial prowess and helped by the amnesiac automaton Chervil, she goes through the different islands of the Kingdom with her own aircraft. Take control of Vernal to discover her quest through her own eyes; unravel the secrets of her past and the mysteries of c9d1549cdd

Features: Full 30-track score composed specifically for the game Includes both an.mp3 version and a high-quality FLAC version Streaming version available to obtain the full soundtrack on PC with any supported audio player New Score: Linking Geoms, Geoms, Geoms Synopsis Chronicon: Linking Geoms, Geoms, Geoms is the first game in the Chronicon series: It features a heartwarming and thrilling story about two sisters travelling to a faraway country to meet their distant relatives, hoping that their love for each other will help them return home safely. Gameplay: Explore a variety of short and long-distance walking paths, jumping over obstacles or taking to the skies to avoid dangers. Collect a variety of item cards, while finding and dealing with the ever-present guards and enemies. Search for key cards in order to clear the world map. Historical Context Folktales and legend tend to merge with one another, on occasion creating a tale of epic proportions. In the modern world, due to the universality of its themes and narrative, Folklore can be seen as a deep and insightful cultural tool in creating and understanding narrative art. In the world of folklore, almost every country has its own version of the tale of the hero and his struggle to recover a precious gemstone that was taken from him and lost. The Chronicon series returns to this tradition through a game in which the player must recover a chain of gems which they have been tasked with returning home. Chronicon: Linking Geoms, Geoms, Geoms is the first game in the Chronicon series. Chronicon takes place in a world where the magical forces of the Elder World clash with those of our own, and where the two worlds bleed into each other. It is a world of regret, anger, love and a need to break free. What's new in Kyoto Colorful Days:

: Apple's Top 10 Developers of 2010 Apple's World Wide Developers Conference showcases the best of the best in the world of software development. More than 25,000 developers from around the world gather to compete for the Apple crown and show off their hard work. For the past three years, I've been covering all of the sessions from WWDC, posting videos of the best stuff on my personal blog. This year's convention center was a bit quieter than previous years, but the selection of sessions from our favorite iOS developer TV shows was still strong. Here are my picks for the top 10 developers of WWDC 2010, presented in no particular order: Ada Grunspan Back in January of this year, Ada Grunspan announced her move from fellow Leopard pal Sybase to Apple. Grunspan's first day on the job involved learning iOS and Objective-C from the ground up, so she doesn't have a lot of Objective-C experience to show. In terms of iOS and its development, Grunspan is pretty darn proud of her first WWDC app, Pizza Fundraiser for the Haiti Relief Effort. The app was designed to raise awareness for the Haiti earthquake relief efforts as well as the crucial job of Americorps members to help with relief. The app was made totally in-house at Apple. Since Apple uses the word "do," we now know that Apple's in-house apps (see Macworld's apps from WWDC for more) are everything but canned. Hillel Toledano The first time I met Hillel Toledano (a.k.a. Turbo Mode), he was smooshing his own iPhone 4 against his fat head while showing me how to use iOS on a handful of devices around his office. With his rich R&B background, he was describing how brilliant the Touch and Siri features of iPhone 3G were – contrasted with what he was doing with 3G on his own non-iPhone devices. I soon realized that Parnell had captured the turbo-mode in Mr. Turbo and could be even more than that; he could turbocharge his coding abilities. I've followed him as his burn rate has skyrocketed. He's gone from being a single man to starting an ad agency to dropping out of design school at Medill (and possibly

working as a designer at Apple). Hille
