Porcine chromosome 10 is the largest of the porcine chromosomes, with a total length of around 152 Mb. To facilitate positional cloning efforts, we assembled a linkage map of chromosome 10 by using 37 microsatellite markers that could be assigned to the pig genome sequence assembly. Linkage analysis revealed a genetic distance of 2.4 cM between the marker loci. In addition, we evaluated the genetic distance of this linkage map in comparison with those of the porcine, bovine, and human genomes. I am well aware of the fact that TV weather forecasters can be notoriously inaccurate (after all, when the Mayans calculated the end of the world for 12.12.2012, they knew and then forgot to carry on after a week of rain) and so in anticipation of this week's blizzards of maybesque proportions, I thought I would list my options: Skiing

With Click2Speak's new 1.1 version, you can download it for free from the Internet and start using it now. Portable application with a compact user interface and a simple recording manager Click2Speak is a small application with a plain user interface that is rather lightweight and it comes with a simple recording tool. Portable utility that lets you record, edit and share voice recordings While it's possible to handle voice recordings in all the supported formats, Click2Speak only manages WAV files. Therefore, you cannot record and save other types of files as voice memos. You can only manage voice memos, which you can then play back from a separate file or an embedded audio stream. However, note that the sound quality is quite poor, the different recording files tend to overlap and there are no other functionalities that you can expect from a recording tool. The app also lacks a proper help tool that comes with all the features explained here. One final point to note is that the recording tool is only available in a dedicated section of the app, where you'll be led through a short wizard by clicking on the "+New Recorder" button. Easy to handle application that provides a variety of basic features On the plus side, Click2Speak comes with a list of features that can be easily used. There are also several other features that let you play back or share recordings as audio streams. It's also possible that you will be unable to do some things when using the app because of the lack of features.
