These molecules have a highly conserved C-terminal domain that may be involved in protein-protein interactions and an N-terminal coiled-coil domain. The predicted protein has a coiled-coil and a C-terminal domain that share about 50% identity with those of Nppa, one of the human members of the same family. Despite this similarity, the known functions of Nppa and Nppa2, the human homolog of the mouse mutant, are quite different. Nppa has been implicated in neural development through its down-regulation by an antisense construct that is capable of blocking in vitro differentiation of neuroblastoma cells. This protein has also been implicated in the control of the Rho-dependent actin cytoskeleton, which may be involved in neuritogenesis and cell migration. Single tumor cells were transplanted by the s.c. or i.v. route into nude mice at 2, 3, or 4 wk of age. A vigorous tumor developed with cells transplanted at 2 or 3 wk of age; the rate of metastasis in the kidneys was much higher in mice transplanted at 3 wk of age than in the mice transplanted at 2 or 4 wk of age. If tumor cells were transplanted at 4 wk of age, but in a site that permitted mild invasion, then the intensity of invasion was apparently not a major determinant of the rate of metastasis. On the other hand, if the cells were transplanted in a site

My leftmost tab (cell) is a TableViewController. My rightmost tab is a NavigationController. On top of the TableViewController I have a "Results" view controller that I would like to load when a table view row is selected. This view controller will have a list and a detail view. When I try to load the view controller when I select a row, I get the following error: 2015-10-24 15:42:54.276 Project[3883:4106712] *** Terminating app due to uncaught exception 'NSInvalidArgumentException', reason: 'Application tried to present modally an active controller .' *** First throw call stack: (0 CoreFoundation 0x000000011396e249 __exceptionPreprocess + 165 1 libobjc.A.dylib 0x0000000116a3a07c objc_exception_throw + 48 2 CoreFoundation 0x00000001139676e3 +[NSException raise:format:] + 205 3 Foundation 0x0000000113a02a15 -[NSException raise:format:] + 103 4 UIKit d0c515b9f4

It works fine in Firefox, but not IE, Chrome, Safari, or Opera. I will include a screenshot of the error below: As you can see, it says the error #2044. Also, this error only happens when I go to the page. If I refresh it, it loads fine. I have done some research on this error, but it appears that it is "an unkown exception that can occur when accessing a remote file". Unfortunately, I cannot use a local database to save items. The code itself is no more that 3 very simple lines. Here is the code: try { //Load the bgMap, might say "Access Denied" in Firefox var bgMap:Bitmap = new Bitmap("img/bgmap.jpg"); } catch(e:Error) { trace ("Error while loading bgMap"); } The only other possible line of code which would seem to be causing the error would be "var bgMap:Bitmap = new Bitmap("img/bgmap.jpg");", but I'm not exactly sure what causing it. As always, any help would be appreciated! A: IE9 seems to have a problem when loading SWF from different origin (CORS). See also this SO question and answer. According to this link, IE has a problem loading non CORS SWF from an HTTPS domain if IE8 is installed. Cloning and expression of SARS S and M proteins. A polymerase chain reaction (PCR) was used to generate genes coding for two proteins (S and M) of the SARS virus (SARS-CoV). The coding sequences of the two proteins were cloned into the expression vector pET28a, expressed in E. coli, and purified using Ni-NTA affinity chromatography. The expressed proteins were found to be soluble in bacterial cells and
