How to play: Use WASD keys to control your Hider: W - Switch to your secondary role S - Switch between Screens & Arrows - Move around Left mouse or keyboard - Interact with objects Right mouse or keyboard - Make cool stuff... SUSPENDING :- Not implemented yet. This game uses WASD keys to control your Hider. You have a secondary role. Pressing WASD will swap to your secondary role. Pressing Space will switch to your secondary role and press 'R' again will swap back to your primary role. Left click or right click moves your Hider in that direction. Mousing over any object will add an item to your inventory. Pressing 'S' or holding it down will save the game state to a wav file. You can import the wav files into your game with any audio software such as Audacity. Turning the volume off and on from the game will sync the volume with your audio software. Repeat this process as many times as possible to get a perfect sync. Hold Space to enable your Dummy. Hold Left Shift to enable your Umbrella gun. Hold Right Shift to enable your Sun God Lenses. Hold Z to enable your Sandstorm. Hold E to toggle hide and seek mode on and off (this mode will be removed soon). Hiding mode will be included in the next update. (Here's a hint: Use WASD keys to hide). You will have a choice to pick your primary role on the main menu. You can change it to anything you like. I changed mine to "Thinker" from the start. You can change your secondary role on the main menu at any time. You can also change the secondary role to anything you like on the main menu. There will be a 4 person max. because of the game's memory requirements

Transgenic mice (Jackson Laboratory) were bred with transgenic mice expressing the Cre transgene under the control of the CD4 promoter ([@bib9]) to segregate the transgene. Transgene expression was assessed**
