The Anglofox website provides students and educators with instructional materials and. reading the PDF (the book) of a textbook as opposed to. of non-English terms that may be appearing in the text.,1. Field of the Invention The present invention relates generally to a method and an apparatus for adjusting the characteristics of a radar system, and more particularly to a method for adjusting the amplitude of a signal, and an apparatus for adjusting the characteristics of a radar system. 2. Description of the Related Art A traditional method for a radar system is divided into two stages. The first stage is to adjust or calibrate a transmitting output power and a receiving output power for an AM radio signal which is used to adjust the characteristics of the radar system, and the second stage is to optimize the characteristics of the radar system. FIG. 1 is a block diagram of a prior art system for adjusting the characteristics of the radar system. As shown in FIG. 1, the prior art system 10 comprises an amplitude transmitter 12, an amplitude receiver
