Caterpillar and elastomers, G080R, G080-1, and G080-2 caters to the high volume sample preparation needs of the laboratory environment. And then you do the same thing with the url and the custom tool is created (or in this case, the tool is created and the url is added) Don't forget to check the membership mode in Access Control Manager -> FPC. How to use to create a custom tool Access Control Manager -> FPC Create a Custom tool: Using the tool editor (On the FPC toolbar on the left hand side), you need to edit the Parameters first. In the parameters editor you will see a list of parameters, the left panel should show the parameter name. And the right panel will show the parameter info. Use the parameters editor to edit the parameters. In the same way, you should create the tool using the parameters which you have selected in the parameters. Creating a tool in Access Control Manager -> Custom tools: Access Control Manager -> Custom tools But I don't have access to the web version of Access Control Manager. I just tried from my iMac and it said "Please log in to FPC. I don't know if I need to be part of the online version, but I'm not sure how to be part of it. I have an email address, and I tried to give it to Access Control Manager, but it said it doesn't recognize it. A: I figured it out. I did the following: Go to the FPC site and log in. Go to access control manager and create a custom tool. Make sure that you select the 'From the desktop' option to create the tool. Add your tool to Access Control Manager. In Access Control Manager -> Access Control -> FPC Go to tools -> selected custom tool In this screen, ensure that the tool is checked. This allows the tool to be sent to other agents and is the equivalent of adding your custom tool to the agent. Then access control manager should be able to see and manage the tool.
