Photoshop Elements Elements is another type of popular free photo editor, like Paint Shop Pro. It's designed to be easy to use. It uses a drag-and-drop interface and is meant to help you make the best out of the camera's pictures. It is easy to use and very convenient to work with, and it can be an ideal starting point for beginners. Although it is the easiest way to work, it also has a few drawbacks. Elements does not support layers and therefore is not a true image editor. Instead, it enables you to make changes by using features that are called adjustment layers, which are more like adjustments that you might make in a traditional image editor. (See the sidebar "Adjustment layers" for more information.) You must save your projects often; otherwise, you risk losing work because the program does not automatically save work when you shut down your computer. Adobe has recently released a new version of Elements that combines the work of Adobe Illustrator, Photoshop, and After Effects into one all-in-one image-editing software known as Adobe Creative Suite. It's a powerful tool that has many new features, including the ability to import vector graphics and shape layers. As a beginner, Elements may be a better choice than Photoshop because

it is easier to use and has the ability to save more information. For more information on Adobe Creative Suite or its latest version, Creative Cloud (see Figure 15-4), check out the Adobe website at

In view of the odd and unusual responses of the conservative media to this election — with The New York Post declaring that “Trump, Clinton Tops Survey” and Fox News declaring that Clinton “won” Ohio and Michigan — a word of advice to Hillary Clinton and her campaign: if you want to begin the general election with the advantage, don’t hold any press conferences with the media. Let us be clear: The conservatives in the media have lived in an ideological bubble. For months, the conservative media has been telling us that Hillary Clinton and the DNC rigged the Democratic primary against Bernie Sanders and was not interested in protecting Clinton’s candidacy. But now the conservatives in the media are scrambling. Clinton and the DNC have won the battle for who controls the Democratic Party, and now the Democrats are in control of the Democratic Party. They now have the power to choose what messaging to offer the public, how to handle the Democratic convention, and how to structure the general election. It may be too late for the GOP to win the presidency, but they might still win back the Senate and the House. If you want to begin the general election with the advantage, don’t hold any press conferences with the media. The fact that Clinton doesn’t have to respond to the media’s questions isn’t an advantage. It’s a weakness. And the reason the Clinton campaign should avoid press conferences is because it has done so already. In January, Clinton held a press conference with New York Daily News that revealed a lot of negative things about her. The only good thing that came out of the press conference was that Clinton learned what the Clinton team had known all along, that it was her old campaign manager who was angry with her for “driving him out of the campaign in August” and “didn’t support her through it.” No one is buying the idea that Clinton faced no tough decisions during the campaign when the Daily

News kept writing about her campaign. If the press conference was an ad for the campaign, the Clinton team should have run it over and over again. But they didn't. Instead, they tried to explain themselves by saying they were not holding the press conference. This was a terrible idea because, as the media was quick to point out, she had to answer reporters' questions. When the Clinton team presented Donald Trump with the easiest job in the world, running
