Virtual Desktop Full is a full-featured and reliable free virtual desktop.. For Windows 8/8.1 and Windows Server 2012/2012 R2: Install or Upgradeâ€¦Q: Can't set getNumberFormat in my theme I'm trying to create a custom theme for the getNumberFormat() function. I created a file called styles.xml in my custom theme and placed the following into it: 0 Then I added the following to style.xml: 0 When I test my app on a device, the NumberFormatTextView inside the application uses my custom theme, but the NumberFormatTextView from the built in app on the same device uses the built-in theme. I've tried numerous things, including: Placing the 0 directly above the parent
