Recommendations from international authorities, as well as from local health authorities, have been in place since mid-January and endorsed at the National and Community level for the prevention of the spread of the disease and containment of its consequences on the population's health. Specific measures have also been established by various organizations for patients infected by SARS-CoV-2 \[@bib0001],[@bib0002]\]. Several strategies have been implemented for the prevention of the spread of the epidemic; in particular social distancing, expansion of precautionary measures for social gatherings and quarantines for confirmed/suspected cases. Quarantines are easy to enforce and are fully compliant with the fundamental right to privacy guaranteed by the constitutions of most of the European countries. They are being systematically enforced at the end of January in Spain (after
