Q: Ruby on Rails: How to import a CSV file as a table? I have a CSV file that I would like to import and use as a table. I followed the Railscast and did this: `require 'csv'` `csv = CSV.foreach('books.csv') do |row|` `author, title, publisher, year, pages` `end` This works fine, however, after importing the csv file, I don't have any columns with data from the book.title and book.publisher fields. I'd appreciate if someone could point out where I'm going wrong, or how to make this work. Thanks in advance! Edit: I'm currently using this csv file: `name,age,occupation john,23,student steve,25,programmer asd,1,student asd,1,student asd,1,student` when I do this: `csv = CSV.foreach('books.csv') do |row|` `author, title, publisher, year, pages` `end` the only thing that happens is `csv` is returned, no error appears at all. A: This is because you are not loading the library. You have two options for that: You can require it in your script like this: `require 'csv'` or you can use your gems: `bundle` and then just use `require` like you did. PS: If you are using ruby 2.0 you might want to use just `require :csv`: To import a CSV file as a table, you need to use the CSV class: `require 'csv'` `CSV.foreach('books.csv', headers: true) do |row|` `author, title, publisher, year, pages` `end` This will import the data into a Hash, where the keys will be the column names (author, title, etc.) and the values will be a reference to the CSV row. What's New in the Photoshop Windows 8.1 Download?

The Woman in Black is one of the most romantic ghost stories of all time, and is quite possibly my most beloved movie of all time. But it's also my most apt movie for tackling the perils of pregnancy. It's not just a ghost story of a pregnant woman and her unborn child, but rather a family drama of a pregnant woman and her older sibling. The Lady of Shallot is a modern day Emily Bronte's gothic romance. It's all about a pregnant woman who is pregnant with twins, and she's playing with the life of her older sibling. Or perhaps the ghost of the woman in black wants to finish what Emily started. The Woman in Black is a painfully realistic depiction of a family dynamic that can go terribly wrong if you don't pay attention to the pregnancy signs. I have two beautiful twin sisters and one older brother. In between our household, I'm constantly reminded of the trials of being pregnant and the dangers of going through labor. I live in fear of the mythic Woman in Black, both visually and psychically. But it doesn't have to be a woman: men suffer their own trials as well. The first sign of the twins was a contraction. It feels like a spider crawling up my back, and it wakes me up twice a night. I would never dream of getting an abortion and not noting how physically uncomfortable it can be, but that is in fact the point. When the sign of pregnancy begins to take shape, you must not brush it off. It's like hearing your own heart beat in your ears. You hear your own heartbeat; it's a sign that you're going to die. The first time I did see the Woman in Black, there were contractions, and I ran downstairs and cried. But I was too scared to call or message anyone. My husband was in the middle of chemo for his cancer, so there was no way he could go to the hospital. It was a little like the movie The Shining, but with contractions. I didn't want anyone else to know. In reality, the only person I could call was my older sister, my surrogate M.E., because I didn't know if I was having boys or girls. Neither of us ever had a twin before, so we had no idea the effect a pregnancy could have on a family. Suddenly I had to think, "Do I want my daughters to feel like I did?" Because I was pregnant with girls, I felt pressured to keep
