Here I want to get VMware Workstation Pro. When I run the above code I get the error as: Error: not found My operating system is 64 bit. A: I think, we should use the command line way. Like this: `runas /netonly /user:administrator "c:\Program Files\VMware\VMware Workstation Pro\vmware-vdiskmgr -s ""C:\Program Files\VMware\VMware Workstation Pro\vmware-vdiskmgr.exe"" /uninstall` A: See if your trial can be used on a "different" computer.

A new 4-benzoylthiosemicarbazide: design of a thyroxine-like prodrug for monitoring the activity of a bioconversion enzyme. A new 4-benzoylthiosemicarbazide is designed as a prodrug-like prothyroxin bioconversion product. It undergoes rapid formation of the active species, thiosemicarbazone, in vivo. The bioconversion of this prodrug to thiosemicarbazone is monitored by a simple and convenient spectrophotometric assay. In the presence of microsomal enzymes (cytochrome P-450 and alcohol dehydrogenase), the 4-benzoylthiosemicarbazide is bioconverted to a thiosemicarbazone derivative (high-performance liquid chromatography method). In the presence of the latter, the prodrug is converted to the thiosemicarbazone in a time-dependent manner. The large differences in the rate and extent of formation of the thiosemicarbazone in the presence of the different enzymes allow for detection of the microsomal activity of the enzymes in different tissues.
