## Justcuzican's Pogo Auto Loader V2.3.0 And Bw Patch 6.1 !!BETTER!!

December 21, 2563 A.D. - justcuzican Pogo v2.3.0 autoloader and bw patch 6.1. After my work on the autoloader did not end well, I decided to make it better. And since it happened very on time, I decided to make a new autoloader for the new year. And the new autoloader is Bw Patch 6.1. Of course, I tried to make it as universal as possible, but this does not mean that it works on any version of the program. So it's better to immediately look at the list of versions used for this autoloader. P.S. I don't think it's a bug, I think it's a feature)
