. A Space Odyssey (1968) by A. S. Komarov was a very impressive work. It gave a new impetus to the development of space technology. The following year, the Soviet Union launched an even more sophisticated launch vehicle that launched a spacecraft carrying three cosmonauts into orbit, who were to make an orbital expedition and then circle the Earth for several orbits. The cosmonauts, as well as the instruments of the ship, were equipped with the most modern equipment for those times.
